Digital Photography Students Host Grad Show

(Sault Ste. Marie, ON April 17, 2013) Sault College's Digital Photography students proudly present "RAW" at the Canadian Bushplane Heritage Centre on Friday April 19th from 5:00pm to 9:00pm. After two years of technical and creative exploration, the show will showcase the graduates most prized photographs and professional portfolios.

"Centering on the theme of RAW, the skills of each student have evolved from the first day of class throughout their studies with us," notes Colin Crowell, Instructor of the Digital Photography and Imaging program at Sault College. "Working in raw format, the students have complete creative control; some with distinguished styles, some ever evolving. The photographers emerging from the program as a whole, are very diverse, extremely talented and equally passionate. As individuals, they strive for perfection, challenging themselves creatively and technically."

The featured works push the limits of photography and play on the line of ethics. Playing with lights and extreme subject matter, the artists draw in the eye with strong composition and evocative lighting, engaging the senses of sight. With gripping images enflaming the senses, the

photographers have enticed taste, pushing food photography to the edge. Featuring instrumental music and light refreshments, this event is designed to entice three of the major senses.

“The graduating Photographers professionalism comes across in great depths, notes Brad Jones,” Photography student. “We are proud to firmly stand behind the two year program at Sault College, and are excited to show what two years of dedication and determination produces.”

This event is open to the public and is free of charge. For more information, contact Brad Jones by email at bradjonesphoto@gmail.com

About Digital Photography and Imaging Program at Sault College

This two-year program provides instruction geared towards professional digital image capture, digital manipulation, and production of high-quality photographic images that adhere to the industry standard, for use in print and electronic media. Students use current photographic technologies including cameras, lighting equipment, and computer hardware and software. Also, students focus on producing images using design and compositional techniques for high aesthetic value and effective visual communication. By combining the fundamentals of photography with professional digital imaging techniques students gain the skills necessary to meet industry standards. Sault College, located in Sault Ste. Marie, Ontario is one of 24 community colleges in Ontario. Visit our website at www.saultcollege.ca for more information.
