Field skills and hands-on learning are a major focus of all our program areas. Most of our outdoor studies take place where they are meant to – in the outdoors. So take it outside and learn with us.
LEARNING IS ONLY NATURAL OUT HERE

STUDY IN A LOCATION INSPIRED BY SPECTACULAR SURROUNDINGS
Sault College is nestled between stunning Lake Superior and pristine Lake Huron with countless inland lakes, streams and a diversity of forest types. Our campus is the perfect place to undertake studies committed to the protection, conservation and sustainable management of Ontario’s diverse and majestic ecosystems. Sault College offers a number of exciting programs for those that love to work outdoors and engage in curriculum inspired by rugged wilderness and breathtaking beauty.

FOREST CONSERVATION TECHNICIAN
Be part of our planet’s future by studying in a well-established program with a long history and strong reputation for the sustainable management of Canada’s forests.

ADVENTURE RECREATION & PARKS
Train to work in a provincial or national park and as an expedition leader. Choose between a 12 month accelerated or two year regular program offering the best in outdoor adventure.

FISH & WILDLIFE CONSERVATION
For those interested in the sustainable management of fish & wildlife, the program has you conducting surveys and inventories to assess wildlife populations and their habitat requirements.

NATURAL ENVIRONMENT TECHNICIAN / TECHNOLOGIST
Learn how natural ecosystems function and how they can be protected, conserved and managed responsibly.

NEW! NATURAL RESOURCE/ENVIRONMENTAL LAW - INSPECTION AND ENFORCEMENT
For those who have graduated from college or university in a related field, students will gain knowledge, expertise and professional skills in investigations and enforcement relating to natural resource and environmental law.
