Job Overview - Description & Duties

Your Role

Environmental Technician and WWTP Operator II

Perform all regularly scheduled monthly, quarterly, semi-annual and annual sampling and inspection requirements and any other extra sampling/inspection/maintenance requirements as needed.

Responsible for operating and maintaining a highly automated waste water treatment plant that includes chemical handling, workplace inspections/corrective actions and also responsible for supporting an environmental compliance and monitoring program that includes sample collection/submission, dam safety inspections, maintaining WHMIS inspections and records, maintaining inspection/records for fire extinguishers and AED devices, accurate data input/reporting and records-keeping, field instrument calibrations, hard copy file scanning and management, with all of the above in general adherence to all applicable laws including environmental and occupational health and safety regulatory requirements and all site specific legal instruments.

Work is performed at the closed/decommissioned gold mine site mostly within the waste water treatment plant building but includes exposure to harsh winter/summer extremes and wildlife (including bears, moose, wolves, coyotes, lynx) for outside duties around the Interlake Tailings Facility and in the field for water sampling.

Required Skills

Completion of a technical or technological diploma or degree, in Environmental or related sciences, plus 5 years of relevant field experience, preferably related to the mining industry, would be an asset.

Requires good organizational skills with exceptional communication skills in oral, written and presentation mediums and can work to resolve issues independently or in a team setting with self-initiative to continually identify and improve on systems and procedures.

Competency, through knowledge, training or experience, and familiarity with all environmental and occupational health and safety regulatory requirements within the Ontario and Canadian jurisdiction a core asset.

Experience in process control systems, programmable logic controllers, minor mechanical repair/replacement of process equipment, instrumentation, electrical and computer software and systems/networks maintenance a definite asset.

Training certificates for Emergency First Aid, Confined Space Entry, Transportation of Dangerous Goods, Workplace Hazardous Information System, OHS Awareness Training, Pleasure Craft Operator Card, Forklift Operation and Propane Cylinder Exchange Training, Fall Arrest, Chainsaw Operation Training, Snowmobile and ATV Operation considered as key components for the position.

Other Requirements

NA
